DETAILED ACTION

Continued Prosecution Application

- 1. The request filed on February 5, 2002 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 08/801,464 is acceptable and a CPA has been established. An action on the CPA follows.
- 2. The amendment filed December 18, 2001 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Application/Control Number: 08/801,464

Art Unit: 3724

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 3, 4 and 6-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gautron, pn 3,398,620.

Gautron discloses a cutting method with every active step of the claimed process including cutting a substrate (e.g., T) having a slice line (e.g., D) and a guide line which is an electrode line/layer (e.g., 13), and detecting a position of the guide line (e.g., with 15, 16) and correcting the cutting position. Gautron only lacks the specific work piece on which the method is performed. However, it would have been obvious to one having ordinary skill in the art to adapt the method of Gautron to gain the benefits taught thereby including a process for accurately cutting along a line in a sheet or otherwise flat piece of material, particularly on a substrate of a thin film semi-conductor device to gain the advantages taught by Gautron.

Regarding claims 3, 8, 9 and 12, Gautron lacks the slice line and guide line being simultaneously formed, lacks an electrode line on the substrate in addition to the electrode layer, and lacks the slice line comprising an electrode line. However, these features appear to be matters of design choice to one having ordinary skill in the art and appear to lack criticality. For example, the slice and guide lines being formed at the same time appears to have no impact to the cutting

Application/Control Number: 08/801,464

Art Unit: 3724

process or its results. Similarly, the step of forming an electrode line appears to have no impact to the cutting process or its results particularly since the electrode line is not included in any active process steps. Similarly, the slice line comprising an electrode line appears to have no impact to the cutting process or its results particularly since there is no detection of the slice line and further

since the slice line is cut away.

Any inquiry concerning this communication or earlier communications from the examiner 5. should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during

normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers for this group are: formal papers - (703)305-3579; informal/draft papers - (703)305-9835.
